Arctic Wolf® Aurora Endpoint Security

OUTCOME-DRIVEN ENDPOINT SECURITY

Aurora Protect

Stop threats before they disrupt your business with Aurora's market-leading Alpha AI-driven security.

Simple and Effective

Powered by the Aurora Platform, Alpha AI prevents attacks before they start.

Built for You

While other endpoint solutions charge a premium for advanced features, we focus on delivering the best results for your security budget.

Security Journey

Move from tactically responding to your endpoint security to a broader security program to assess, mitigate, and transfer cyber risk.

The Cybersecurity Landscape

Today, organizations are exposed to more cyber risk than ever. In fact, at least seven out of 10 organizations believe that their sensitive data was compromised or breached in the past 12 months.

Organizations have invested their time, energy, and budget on multiple security tools and point solutions to try to solve this challenge. This strategy, however, has yielded negative returns due to alert fatigue, skill shortage, and ineffective security responses.

To address this challenge, what's needed as a foundation is a simple, highly effective endpoint solution and a security operations partner that work together, enabling organizations to spend more time achieving consistent cybersecurity outcomes and building cyber resilience.

Aurora Protect provides AI-driven security to stop endpoint threats before they disrupt your business. Designed to be easy to use and highly effective even on difficult to protect systems.

Supported Operating Systems

Microsoft
- Windows 365 (Business, Enterprise)
- Windows 10-11
- Windows Server 2012-2025

Apple
- macOS 11-15

Linux
- Ubuntu 18-24
- Suse Enterprise Server 12, 15
- Red Hat Enterprise 7-9
- CentOS 7-8
- Oracle Server 7-9
- Oracle Server UEK 7-9
- Debian 10-12
- Amazon 2, 2023
- Alma 8-9
- Rocky 8-9

Outcome-Driven Endpoint Security

20x ▼ Powered by Alpha AI for Endpoint Security, Aurora delivers top-tier efficacy ratings while maintaining ultra-low resource usage—**20x less CPU utilization than competing solutions**—even when offline.

90% ▼ Speed up your investigations and reduce tedious security analyst demands with **30% faster incident investigation and 90% reduction in alert fatigue.**

100% Provides **100% return on investment** according to Forrester Total Economic Impact Report.

About Arctic Wolf

Arctic Wolf® is a global leader in security operations, delivering the first cloud-native security operations platform to end cyber risk. Powered by threat telemetry spanning endpoint, network, identity, and cloud sources, the Arctic Wolf Aurora Platform™ ingests and analyzes trillions of security events each week to enable critical outcomes for most security use cases. By delivering automated threat protection, response, and remediation capabilities, Arctic Wolf delivers world-class security operations with the push of a button so customers can defend their greatest assets at the speed of data.
